Enhanced Data Protection Eliminates Critical Security Gaps

Cyber-attacks and the cost of compromise is a significant concern for public and private organizations. ADOA's ASET Division identified gaps in cyber security and created pathways to mitigate those liabilities. To date, **77 security gaps have been eliminated and 28% of the enterprise controls are in place.** By eliminating duplicative software and licensing agreements, **\$500,000 in contract savings and an estimated \$680,000 in cost avoidance** has already been achieved.
