

ARIZONA MANAGEMENT SYSTEM SUCCESS REPORT

DEPARTMENT OF WATER RESOURCES

Ensuring Safety of Water Resources Field Staff with Standard Daily Check-ins

Department of Water Resources field staff annually collect roughly 2,200 water level measurements from wells throughout Arizona. Cellular phone coverage is sporadic in many remote parts of the state, and ensuring safety and reliable communication is a department priority. The department has purchased personal satellite phones for each field staff member and has **standardized twice-daily check-in procedures** to verify team members are safe and accounted for.
